

A modern office interior featuring a staircase with glass railings and a polished floor. The lighting is bright and even, highlighting the clean lines of the architecture.

ACRYLICOAT™

A true single coat solution:  
applies better,  
hides better,  
**ultimately  
costs less.**

Acrylicoat™ from Valspar is a single coat solution that offers benefits at every step of your process.

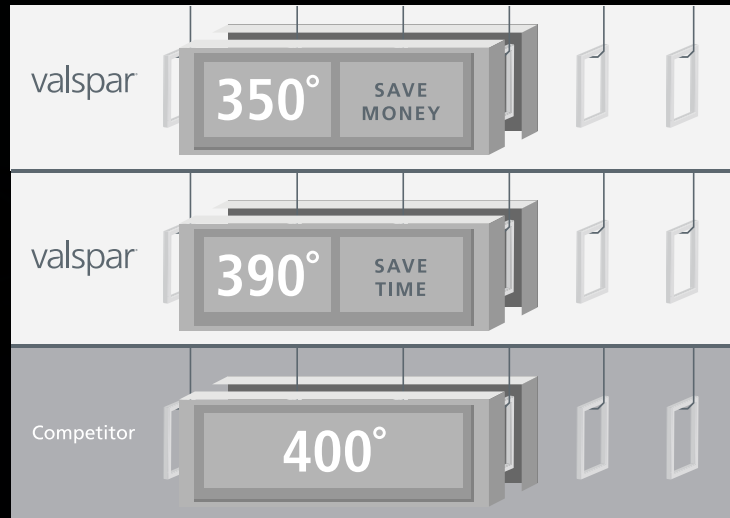

## What it is

Acrylicoat™ is a cost-effective acrylic coating made with a proprietary resin system developed by Valspar. Acrylicoat offers exceptional hiding on the first pass, significantly reducing applied costs for applicators. Available in a wide range of colors and gloss levels, Acrylicoat provides an attractive one-coat finish that is versatile and easy to apply.

valspar®

## LOWER APPLIED COST

Competitive acrylic coatings often require a second pass through the line to achieve full hide. Acrylicoat's improved sag-resistance achieves a higher film thickness on the first pass, significantly reducing the need for a second pass through the line. This results in lower-applied costs and increased throughput.

## VERSATILITY

Acrylicoat is a highly versatile coating system. Acrylicoat has a large coating window of 350°-390° F, giving you flexibility on your line. Cure at a lower temperature to save energy costs, or cure at a higher temperature at a higher line speed for increased throughput.

## Impressive Aesthetics

- 18 standard colors
- Custom solid and metallic colors available on request
- 10-80° gloss levels available
- Smooth, glasslike finish

## Applications

- Interior and exterior window and door frames, panels, and other aluminum extrusions
- Ideal for high-traffic areas in residential and commercial buildings

## Cost-Effective Solution

- Enhanced hiding means full hide on the first pass, reducing applied-costs associated with production
- Wide curing window offers flexibility on your line
- Ready-to-apply solution, no additional solvents needed

## Performance

- Meets or exceeds AAMA 2603 standards
- One of the hardest finishes available
